

I understand that one of my favorite FM translator services, K-LOVE Radio, listened to on 94.7, 94.9 and 105.3 FM in the Memphis, TN area could be in jeopardy of being forced off the air if the proposed expansion of Low Power FM stations is allowed which would take priority over existing FM translator services.

I am a long-time listener and monthly financial supporter of this station and my family listens to it daily. It serves as a refreshing oasis of very positive and encouraging music not only to us, but to hundreds of thousands of people all across the United States.

If this station were to be taken off air, there would be a great void that could not be filled by any other station in this market. K-LOVE serves as a light in a very dark world and offers the public hope and encouragement utilizing family friendly programming with wholesome values while providing very high quality listening enjoyment that should be allowed to be heard by everyone.

Your consideration of these comments is greatly appreciated.

Respectfully,

Michael R. Tapley
